

Project: I-15 MP 8, Bicycle/Pedestrian Passageway

Recipient: City of St. George, Utah

Location: St. George, Utah

Purpose: Due to beautiful weather nearly year round, citizens are prone to walk and bicycle to work, shopping and other destinations. The city is bisected by I-15, with limited places to cross (St. George Boulevard, 100 South and 700 South). Sidewalks are provided on 100 South and 700 South, but not on St. George Blvd, putting pedestrians and bikers at great risk. The planned passageway would provide a safer crossing.

Amount: \$1,800,000
